Trends, rhythms, and aberrations in **global** climate 65 Ma to present

By: Zachos, J (Zachos, J); Pagani, M (Pagani, M); Sloan, L (Sloan, L); Thomas, E (Thomas, E); Billups, K (Billups, K)

SCIENCE

Volume: 292 Issue: 5517 Pages: 686-693

DOI: 10.1126/science.1059412

Published: APR 27 2001

[View Journal Information](#)

Abstract

Since 65 million years ago (Ma), Earth's climate has undergone a significant and complex evolution, the finer details of which are now coming to light through investigations of deep-sea sediment cores. This evolution includes gradual trends of **warming** and cooling driven by tectonic processes on time scales of 10(5) to 10(7) years, rhythmic or periodic cycles driven by orbital processes with 10(4)- to 10(6)-year cyclicity, and rare rapid aberrant shifts and extreme climate transients with durations of 10(3) to 10(5) years. Here, recent progress in defining the evolution of **global** climate over the Cenozoic Era is reviewed. We focus primarily on the periodic and anomalous components of variability over the early portion of this era, as constrained by the latest generation of deep-sea isotope records. We also consider how this improved perspective has led to the recognition of previously unforeseen mechanisms for altering climate.

The screenshot displays the Web of Science search results page. The top navigation bar includes links for Web of Science™, InCites™, Journal Citation Reports®, and Essential Science Indicators. The main header shows the Web of Science™ logo and a search bar. The search results section indicates 23,995 results from the Web of Science Core Collection. The search criteria are TOPIC: (global warming). The results are sorted by Times Cited -- highest to lowest. The first result is 'Nanostructured materials' by Arico, AS; Bruce, P; Scro, NATURE MATERIALS, Volur, Published: MAY 2005. The second result is 'Changes in Atmospheric Constituents and in Radiative Forcing' by Forster, Piers; Ramaswamy, Venkatachalam, Edited by: Solomon, S; Qin, D; Manning, M; et al., CLIMATE CHANGE 2007: THE PHYSICAL SCIENCE BASIS, Pages: 129-234, Published: 2007. The interface includes a 'Refine Results' sidebar on the left and a 'Marked list' section on the right. A blue callout box points to the 'Email' icon in the 'Select Page' section, labeled 'Vytláčené Email'. Another blue callout box points to the 'Save to EndNote online' dropdown menu, labeled 'Uloženie v rôznych referenčných manažeroch a formátoch'. A third blue callout box points to the 'Add to Marked List' button, labeled 'Marked list – vlastný zoznam publikácií'.
