# HubIT Newsletter

## What is HubIT?

HubIT is a Horizon 2020 project running from 2017- 2020 led by the motto "**Technology with and for Society**". The consortium consists of 14 organisations from 10 countries: Estonia (coordinator), Denmark, Germany, Hungary, Israel, Italy, Lithuania, Portugal, Slovakia and United Kingdom.

HubIT is the Hub for boosting the responsibility and inclusiveness of ICT enabled research and innovation through constructive interactions with SSH research.

## The European Framework Model Proposed by HubIT

**The European Framework Model proposed by HubIT will be the backbone of cooperation among different research teams belonging to different Social Sciences and ICT domains, and will help them face the ambitious challenge of including ethics and responsibility into actual research and innovation policies.**

The European Framework Model consists of a comprehensive, coherent and interlinked set of resources, namely concepts, definitions, tools, and guidelines, all of them publicly available online at the "HubIT Metropolis".

## COMING SOON

# HubIT Metropolis

**As part of the dissemination and communication plan the HubIT Online Collaborative Platform will be created to gather information on the European Framework Model tools and services.**

This online collaborative Platform is represented as the HubIT Metropolis, where all the activities, tools and resources deployed in the project are made available at different locations. This will facilitate and encourage constructive interactions between stakeholders leading to a responsible approach to Research and Innovation.

Soon you will be able to visit our Metropolis and to contribute to linking Social Sciences and Humanities and Responsible Research and Innovation practices with key ICT issues. There will be lots to see and do!

## Ecosystem Mapping
### Building an RRI-SSH Ecosystem

During the first 6 months of the project, HubIT conducted an "ecosystem mapping" exercise. The objective was to collate, clarify, curate and publish information about responsible ICT research and innovation projects, actors, activities and initiatives.

The resulting databases of projects and actors contain 120 projects from 20 countries and 552 actors from 486 organisations and 37 countries.
