Updates

Welcome to a new look and a new name. The old Register Plus is now the European Patent Register. The new European Patent Register delivers exactly the same information as before: procedural information for patent applications handled by the EPO, online file inspection (click on the "all documents" tab) and legal status information for the national phase. Nothing added, nothing taken away, except the information is now packaged in a newly designed user interface. The new design offers improved layout, usability, ergonomics and navigation, using contemporary design criteria, which we've implemented in consultation with the user community.

The majority of our users will access the European Patent Register direct. If you're one of them, then the URL to remember is

<https://register.epo.org>

Why not add it to your favourites?

The European Patent Register is also accessible from the link on the EPO's new home page or via:

<http://epo.org/register>

Rewrites from the old (temporary) URL <http://register.epoline.org> are in place but we recommend that you update your bookmarks
