

Visit the HubIT Metropolis!

Building bridges between the ICT and social sciences and humanities experts is what the HubIT project is called to life for.

Take a look at the HubIT Metropolis and check how you could benefit from it. A hint – it is worth going to the Get Connected Airport to see who else is looking for contacts from the ICT-SSH communities.

We have organised several events during the last period which you can catch up on in this newsletter. In the coming years several community building events will take place all around Europe. Follow the HubIT Project and don't miss our next stop.

Last, but not least – after exploring the Metropolis, share with us your user experience and let us know if you would like to share good practices, attend our events as a speaker or participant or if you have any other idea for collaboration.

Check all the HubIT Resources in the HubIT Metropolis.

Interview with Dan Podjed

Founder of the EASA Applied Anthropology Network and Why the World Needs Anthropologists international event.

What are the four steps for designing products with and for people and why to move from inter to transdisciplinary? How to combine anthropological and engineering approaches to develop a culture-sensitive and environmentally responsible smartphone app for motivating people to change their mobility habits?

Assessing the Impact of SSH-RRI approach on ICT Research & Innovation

HubIT is creating an ecosystem that will encourage interactions between ICT stakeholders and Social Sciences and Humanities researchers that will assure that ICT development takes into account societal needs. Thus, a social impact assessment (SIA) plan and tools were developed including online ready-made questionnaires and repository of items for tailoring questionnaires and observation guide organized around the six dimensions of RRI. First results from the HubIT events indicate an increase in understanding and awareness of the SSH-RRI approach among SSH and ICT researchers and an increase in future plans for collaborations between these two groups.

HubIT 1st Policy brief is out!

In preparation for the upcoming policy workshops, and as a contribution to the Policy recommendations which will be produced at the end of the project, the HubIT team has prepared the first Policy brief. The aim of this policy brief is to give an overview of the current state of the debate regarding the role of social sciences and humanities in research and innovation (R&I) in the EU.

HubIT NEXT EVENTS

Did you miss our annual HubIT conference in September last year in Tartu? Were you unable to participate at the International HubIT workshop in Vienna in December 2018? Did the HubIT Networking session at ICT 2018 also take place without you on board? Never mind!

There is a lot more to come in the next few months, and we will be happy to welcome you to our future HubIT events.

Looking for opportunities in the RRI field?

Responsible Research and Innovation (RRI) is a 'cross-cutting issue' in Horizon 2020 and is promoted throughout societal and ICT challenges. We identified a set of calls that aim to:

- Foster the grounding of RRI principles
- Enhance the collaboration between the ICT and SSH sectors.

Check here a set of open calls we have identified.
