

Do you want to develop ICT according to the European Commission's standards?

Join the dozens of HubIT events all over Europe and beyond!

Get the European Commission's stamp of approval to a responsible research and innovation project in ICT!

The HubIT project is currently organising many events. In the last few months, the first set of national and international thematic and networking events have already taken place and were a great success, bringing together hundreds of stakeholders from Information and Communication Technologies and Social Sciences and Humanities, two worlds that usually do not converge (check out our previous newsletter [HERE](#)).

Don't miss the chance to participate in the forthcoming events where you will have the opportunity to network with experts from areas including economics, law, sociology, etc. for potential collaborations and to learn how to improve your ICT projects.

In this third edition of the HubIT newsletter we present the events that have already taken place and offer you sneak peaks of the events that are yet to come

April 26, 2019

Berlin, Germany

(In case you missed it...) Critical Making in Germany

A solar-powered WiFi access point and offline web server, a gender pay gap clock, or a Flickerphone that converts light intensity changes into sounds. The HubIT workshop in Berlin on the 26th April made the concept of critical making tangible by presenting objects to participants produced in maker labs.

GOING INTERNATIONAL!

International workshop, policy workshops and the second annual conference. Our ICT workshop has already taken place, check out some of the outcomes.

How to advance responsible ICT? - HubIT Policy Workshops

May 16, 2018 - Copenhagen, Denmark

June 4, 2018 - Košice, Slovakia

June 26, 2018 - Brussels, Belgium

In May and June, the HubIT project will hold three policy workshops across Europe. The main objective of these workshops is to generate ideas for policy initiatives which could advance responsible ICT research and innovation. Sounds interesting? Then read more about the policy workshops [HERE](#).

Harnessing Technology for the good of society – HubIT International Workshops

September 18, 2019 - Helsinki, Finland

To make the most of any new technology, an IT manager needs a solid understanding of the organization or the project he/she is responsible for and the challenges its users and markets face. Prior to jumping into a new trend in technology, IT managers must ask one question: "How does this help us address current societal challenges and help us meet our strategic goals?".

(In case you missed it...) Impact innovation: cooperation and common grounds - HubIT ICT Industry Workshop

April 2, 2019 - Budapest, Hungary

Innovation has never been so broad and diverse, and the winds of disruption can drive entire industries from unexpected directions. However, there are ways to transform challenges into opportunities, which requires transparency and a unique vision. This platform for discussion was made available at the anniversary SMART conference program where the HubIT ICT Industry Workshop took place.

LET'S GET EXPERIMENTAL

From September 2019

Berlin – Vilnius – Bratislava – Tel-Aviv

Responsible innovations in practice - HubIT Practical Events

Technology will continue advancing and improving our lives, but it is up to us to make sure that we do not end up with societies reflecting the films Matrix, SkyNet or even Wall-E. Let us make sure the 'social', the 'responsible', the 'inclusivity' and the 'human' are not left aside in a fast-growing tech world. It is with this goal that HubIT is organising a set of collaborative and experimental events.

Are you interested in developing new ideas and objects on how to make digital technologies more socially responsible? Would you like to collaborate on ground-breaking projects with people from different backgrounds? If the answer is yes, then you really should participate in our forthcoming practical collaborative events, which are going to start in the autumn of 2019 in Berlin, Bratislava, Vilnius and Tel-Aviv. More information will be available soon but meanwhile you can read more about these events on our website.

Involving the experts!

Co-creation with ICT and SSH experts across Horizon projects

Two heads are better than one and that is why the HubIT team met with its Advisory Board for the second time on March 27th 2019 in Brussels. We are really grateful that ICT and SSH experts representing

different EU projects took the time to join us. Discussing project results and next steps with the Advisory Board gives us a valuable external insight.

The following related projects are represented by the HubIT Advisory Board:
